Auditors' Report

We have audited the financial statements set out on pages 1 to 47 and have received all the information and explanations which we considered necessary. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit the financial statements of certain subsidiaries resident outside of Jamaica, which reflect revenues outside the group of \$364,815,000 and \$282,778,000 for the years ended 1 May 2004 and 3 May 2003, respectively. Those statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for those subsidiaries is based solely on the reports of the other auditors.

We conducted our audit in accordance with International Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the reports of the auditors of those subsidiaries not audited by us, proper accounting records have been kept and the financial statements, which are in agreement therewith, give a true and fair view of the state of affairs of the Group and the company as at 1 May 2004 and of the results of operations, changes in stockholders' equity of the Group and the company and cash flows of the Group for the year then ended, and have been prepared in accordance with International Financial Reporting Standards and comply with the provisions of the Jamaican Companies Act.

Jamaica Broilers Group Limited

Notes to the Financial Statements

1 May 2004

1. Identification

Jamaica Broilers Group Limited (the company) is a company limited by shares, incorporated and domiciled in Jamaica. Its registered office is located at Content, McCooks Pen, St. Catherine.

The principal activities of the company, its subsidiaries and its associated company (the Group) include the production and distribution of chicken, beef, fish, animal feeds and agricultural items (Note 2(b)).

The company is listed on the Jamaica Stock Exchange.

All amounts in these financial statements are stated in Jamaican dollars except where otherwise noted.

2. Significant Accounting Policies

(a) Basis of preparation

Jamaica adopted International Financial Reporting Standards (IFRS) as its national accounting standards for accounting periods beginning on or after 1 July 2002. The financial statements for the year ended 1 May 2004 have therefore been prepared in accordance with IFRS and comparative information has been restated to conform with the provisions of IFRS. The Group has opted for early adoption of IFRS 1, First-time Adoption of IFRS and has applied the provisions of that standard in the preparation of these financial statements. The effects of adopting IFRS on the stockholders' equity and net profit as previously reported are detailed in Note 32.

These financial statements have been prepared in accordance with and comply with International Financial Reporting Standards, and have been prepared under the historical cost convention as modified by the revaluation of available-for-sale investment securities, investment properties and certain property, plant and equipment.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

(b) Consolidation

(i) Subsidiaries

Subsidiaries, which are those entities in which the Group has an interest of more than one half of the voting rights or otherwise has power to govern the financial and operating policies, are consolidated on a line-by-line basis.

Subsidiaries are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date that control ceases. The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition plus costs directly attributable to the acquisition. The excess of the cost of acquisition over the fair value of the net assets of the subsidiary acquired is recorded as goodwill.

Inter-company transactions, balances and unrealised gains and losses on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

2. Significant Accounting Policies

(b) Consolidation (Continued)

(ii) Associates

Investments in associates are accounted for by the equity method of accounting. Under this method, the company's share of the post-acquisition profits or losses of associates is recognised in the profit and loss account and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the cost of the investment. Associates are entities over which the Group generally has between 20% and 50% of the voting rights, or over which the Group has significant influence, but which it does not control.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the company's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

(c) Equity accounting

The financial statements of the holding company have been prepared on the equity basis whereby its share of the post acquisition changes in the net assets of subsidiaries and associated companies is recognised as an increase or decrease in investment and retained earnings and reserves.

(d) Segment reporting

Business segments provide products or services that are subject to risks and returns that are different from those of other business segments. Geographical segments provide products and services within a particular economic environment that are subject to risks and returns that are different from those of segments operating in other economic environments.

(e) Foreign currency translation

Foreign currency transactions are accounted for at the exchange rates prevailing at the dates of the transactions. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rate. Exchange differences resulting from the settlement of transactions at rates different from those at the dates of the transactions, and unrealised foreign exchange differences on unsettled foreign currency monetary assets and liabilities are recognised in the profit and loss account.

Assets and liabilities of foreign subsidiaries are translated at exchange rates at the balance sheet date, while profit and loss account and cash flow items are translated at average rates over the year. Differences resulting from the use of these different exchange rates are reflected in capital reserves.

Jamaica Broilers Group Limited

Notes to the Financial Statements

1 May 2004

2. Significant Accounting Policies (Continued)

(f) Property, plant and equipment

Buildings, plant and equipment are recorded at cost or deemed cost, less accumulated depreciation. Under IFRS 1, a first time adopter may elect to use a previous GAAP revaluation of an item of property, plant and equipment at or before the date of transition to IFRS as its deemed cost. The Group has elected to apply this provision. All other property, plant and equipment, except land, are carried at historical cost less accumulated depreciation. Land is carried at deemed cost and is not depreciated.

Depreciation is calculated on the straight line basis at such rates as will write off the carrying value of the assets over the period of their expected useful lives. The expected useful lives are as follows:

Freehold buildings	11 - 100 years
Leasehold property	Life of lease
Machinery and equipment	4 – 33 years
Furniture and fixtures	10 years
Motor vehicles	3 – 5 years

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposals of property, plant and equipment are determined by reference to their carrying amount and are taken into account in determining profit.

Repairs and maintenance expenditure is charged to the profit and loss account during the financial period in which it is incurred.

(g) Investment properties

Investment properties are held for long-term rental yields and are not occupied by the Group. Investment properties are treated as long-term investments and are carried at deemed cost less accumulated depreciation. Freehold buildings are depreciated on the straight line basis over their expected useful lives of 11-100 years.

(h) Goodwill

Goodwill arising on consolidation is amortised over its economic useful life, estimated to be 10 years. Goodwill is subject to annual impairment tests and is written off if impaired.

(i) Impairment of non-current assets

Property, plant and equipment and other non-current assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount, which is the greater of an asset's net selling price and value in use. For the purpose of assessing impairment, assets are grouped at the lowest level for which separate cash flows can be identified.

2. Significant Accounting Policies (Continued)

(j) Investments

Investments are classified into the following categories: available-for-sale securities and held-to-maturity investments. Management determines the appropriate classification of investments at the time of purchase.

Available-for-sale securities are those intended to be held for an indefinite period of time and which may be sold in response to needs for liquidity or changes in interest rates, foreign exchange rates or market prices. They are initially recognised at cost, which includes transaction costs, and subsequently re-measured at fair value based on quoted bid prices or amounts derived from cash flow models. Unrealised gains and losses arising from changes in fair value of available-for-sale securities are recognised in stockholders' equity. When the securities are disposed of or impaired, the related accumulated unrealised gains or losses included in stockholders' equity are transferred to the profit and loss account.

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity.

Purchases and sales of investments are recognised at trade date, which is the date that the Group commits to purchase or sell the asset. The cost of purchase includes transaction costs. Unquoted securities are recorded initially at cost, and are subsequently measured at fair value. Equity securities for which fair values cannot be measured reliably are recognised at cost, less a provision for impairment.

Investments in subsidiaries are stated in the company's financial statements at fair value, which is determined on the basis of the company's share of post-acquisition changes in the net assets of the subsidiaries.

(k) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined as follows:

- (i) Processed broilers, beef and fish at accumulated cost of growing and processing, or landed cost.
- (ii) Finished feeds and fertilisers at cost of production.
- (iii) All other items of inventory at landed cost or purchase price.

Net realisable value is the estimated selling price in the ordinary course of business, less the cost of selling expenses.

(l) Biological assets

Biological assets which include fish, cattle, flocks in field together with breeder and layer flocks and pullets are stated at cost as no reliable measure for determining fair value has been identified. Cost is determined as the accumulated cost of livestock, feed medication, and in respect of breeder flocks, accumulated production costs.

2. Significant Accounting Policies (Continued)

(m) Trade receivables

Trade receivables are carried at anticipated realisable value. A provision for impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying value and the present value of estimated future cash flows, discounted at the market rate of interest for similar borrowings. The amount of the provision is recognised in the profit and loss account.

(n) Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents comprise cash at bank and in hand, short term deposits and investments with original maturity dates of ninety days or less, net of short term loans and bank overdrafts. Cash and cash equivalents are carried at cost in the balance sheet.

(o) Borrowings

Borrowings are recognised initially at proceeds received. Borrowings are subsequently stated at amortised cost using the effective yield method. Any difference between proceeds and the redemption value is recognised in the profit and loss account over the period of the borrowings.

(p) Taxation

Taxation on the profit or loss for the year comprises current and deferred tax. Current and deferred taxes are recognised as income tax expense or benefit in the profit and loss account except, where they relate to items recorded in stockholders' equity, they are also charged or credited to stockholders' equity.

(i) Current taxation

Current tax is the expected taxation payable on the taxable income for the year, using tax rates enacted at the balance sheet date, and any adjustment to tax payable and tax losses in respect of previous years.

(ii) Deferred income taxes

Deferred tax liabilities are recognised for temporary differences between the carrying amounts of assets and liabilities and their amounts as measured for tax purposes, which will result in taxable amounts in future periods. Deferred tax is provided on temporary differences arising from investments in subsidiaries, except where the timing of reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future. Deferred tax assets are recognised for temporary differences which will result in deductible amounts in future periods, but only to the extent it is probable that sufficient taxable profits will be available against which these differences can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the asset will be realised or the liability will be settled based on enacted rates.

Current and deferred tax assets and liabilities are offset when they arise from the same taxable entity, relate to the same Tax Authority and when the legal right of offset exists.

2. Significant Accounting Policies (Continued)

(q) Employee benefits (Continued)

(iii) Other post-retirement benefits

The Group also provides supplementary medical and life insurance benefits to qualifying employees upon retirement. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment, using an accounting methodology similar to that for defined benefit pension plans. These obligations are valued annually by qualified actuaries.

(iv) Profit-sharing and bonus plans

The Group recognises a liability and an expense for bonuses and profit-sharing based on a formula that takes into consideration the profit attributable to the company's stockholders after certain adjustments. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

(r) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, if it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Where the Group expects a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date. Where amounts determined are insignificant, they are included in accounts payable.

(s) Leases

As lessee -

Leases of property, plant and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are recognised at the inception of the lease at the lower of the fair value of the leased asset or the present value of minimum lease payments. Each lease payment is allocated between the liability and interest charges so as to produce a constant rate of charge on the lease obligation. The interest element of the lease payments is charged to the profit and loss account over the lease period.

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments under operating leases are charged to the profit and loss account on a straight-line basis over the period of the lease.

8. Taxation

- (a) The egg production operation of Jamaica Poultry Breeders Limited was relieved from income tax until 1989 by virtue of the provisions of the Industrial Incentives Act. With effect from 1990, the egg production and crop growing operations were relieved from income tax for ten years under the provisions of the Income Tax (Approved Farmers) Act. A further five-year period of relief was granted in 2000 by the Ministry of Agriculture.

Subject to agreement with the Taxpayer Audit and Assessment Department, profits in the holding and subsidiary companies that are available for distribution to stockholders resident in Jamaica, without deduction of income tax, amount to approximately \$179,594,000.

- (b) Taxation is based on the profit for the year adjusted for tax purposes and comprises:

	1 May 2004	3 May 2003
	\$'000	\$'000
Income tax at 33 1/3%	107,993	79,016
Tax credit on bonus issue	-	(21,500)
Adjustment to prior year provision	(23,669)	(6,065)
Associated companies	-	27,491
Deferred taxation (Note 15)	60,647	(102,191)
	<u>144,971</u>	<u>(23,249)</u>

The tax on the Group's profit differs from the theoretical amount that would arise using the applicable tax rate of 33 1/3%, as follows:

	1 May 2004	3 May 2003
	\$'000	\$'000
Profit before taxation	<u>606,281</u>	<u>335,077</u>
Tax calculated at a tax rate of 33 1/3%	202,094	111,692
Adjusted for the effects of:		
Tax credit on bonus issue of shares	-	(21,500)
Income not subject to tax	(76,087)	(54,637)
Adjustment to prior year provision	(23,669)	(6,065)
Reversal of undistributed earnings of associate on its disposal	-	(63,383)
Expenses not deductible for tax purposes and other allowances	42,633	10,644
	<u>144,971</u>	<u>(23,249)</u>

Subject to agreement with the Taxpayer Audit and Assessment Department, losses available for offset against future profits of certain local subsidiaries amount to approximately \$11,513,000 (2003 - \$15,054,000).

An overseas subsidiary has net operating losses of US\$1,041,000 (2003 - US\$1,358,000) available for carry forward and offset against future taxable profits.

Other post-retirement benefits	6,800	6,600	5,600	5,500

Pension scheme

The Group participates in a defined benefit scheme, which is open to all permanent employees and administered by an external agency. The plan provides benefits to members based on average earnings for the final two years service or the two years in which the highest salaries of the employee have been earned. The defined benefit scheme is valued by independent actuaries annually using the Projected Unit Credit Method. The latest actuarial valuation was carried out as at 30 April 2004.

The defined benefit asset recognised in the balance sheet was determined as follows:

	The Group		The Company	
	1 May 2004	3 May 2003	1 May 2004	3 May 2003
	\$'000	\$'000	\$'000	\$'000

	(153,300)	(144,300)	(129,600)	(121,400)

Pension plan assets include investment in ordinary stock units of the company with a fair value of \$14,641,000 (2003 - \$4,600,000).

The movement in the defined benefit asset during the year is as follows:

	The Group		The Company	
	1 May 2004	3 May 2003	1 May 2004	3 May 2003
	\$'000	\$'000	\$'000	\$'000

Future pension increases	<u>5.00%</u>	<u>5.00%</u>

Other post-retirement benefits

In addition to pension benefits, the Group offers retirees medical and life insurance benefits. Funds are not built up to cover the obligations under these retirement benefit schemes. The method of accounting and frequency of valuations are similar to those used for the defined benefit pension scheme. In addition to the assumptions used for the pension scheme, the main actuarial assumption is a long term increase in health costs of 11% per year (2003 - 11% per year).

30. Financial Risk Management

The Group's activities expose it to a variety of financial risks, including the effects of changes in debt market prices, foreign currency exchange rates and interest rates. Management seeks to minimise potential adverse effects on the financial performance of the Group by applying procedures to identify, evaluate and manage these risks, based on guidelines set by the Board of Directors.

(a) Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group is primarily exposed to such risks arising from its US Dollar transactions for purchases, and its US Dollar denominated investments. The Group balance sheet at 1 May 2004 includes aggregate net foreign liabilities of approximately US\$6,900,000 (2003 – US\$6,224,000) in respect of transactions arising in the ordinary course of business.

(b) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Group has no significant concentrations of credit risk attached to trade receivables as the Group has a large and diverse customer base, with no significant balances arising from any single economic or business sector, or any single entity or group of entities. The Group has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history. Cash transactions are limited to high credit quality financial institutions. A significant level of investments is held in various forms of Government securities.

(c) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. At 1 May 2004, the Group's operating cash flows are substantially independent of changes in market interest rates. However, the Group has significant interest-bearing assets as disclosed in Notes 13 and 21, and interest-bearing liabilities as disclosed in Note 25.

(c) Liquidity risk

Liquidity risk is the risk that an enterprise will encounter difficulty in raising funds to meet commitments associated with financial instruments. Prudent liquidity risk management includes maintaining sufficient cash and marketable securities, and the availability of funding through an adequate amount of committed credit facilities.

(d) Cash flow risk

Cash flow risk is the risk that future cash flows associated with a monetary financial instrument will fluctuate in amount. The Group manages this risk by ensuring, as far as possible, that financial assets and liabilities are matched to mitigate any significant adverse cash flows.

(e) Market risk

Market risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market. At 1 May 2004, the Group had exposure to market risk, namely through its significant portfolio of interest rate sensitive investments and long-term loans.

32. Financial Effects of Transition to International Financial Reporting Standards

The Group adopted International Financial Reporting Standards (IFRS) effective 4 May 2003. Prior to that date, the financial statements of the Group were prepared in accordance with Jamaican Generally Accepted Accounting Principles (JGAAP). The financial statements for the year ended 3 May 2003 (the immediately preceding comparative period) have been restated to reflect the financial position and results under IFRS. The financial effects of conversion from JGAAP to IFRS are as follows:

32. Financial Effects of Transition to International Financial Reporting Standards (Continued)

Brief description of items of difference:

- (i) Properties held by the Group for rental or capital appreciation, and which were previously included in property, plant and equipment have been reclassified to investment properties as required under IAS 40.
- (ii) Financial assets are classified as available-for-sale securities under IFRS. Premiums and discounts on acquisition of investment securities were amortised on a straight-line basis over the lives of the securities under previous Jamaican GAAP. Under IFRS, premiums/discounts are amortised using the effective yield method. Under previous Jamaican GAAP, the company and the Group measured all investment securities at the lower of cost and market value. Under IFRS, available for sale securities are measured at fair value and the unrealised gains/losses as a result of the re-measurement of available-for-sale securities to fair value are recognised in capital reserves.
- (iii) This reflects the adjustments to the company's share of equity of its subsidiaries due to IFRS adjustments made in those subsidiaries.
- (iv) Provision for deferred tax, which was not recognised under previous Jamaican GAAP, is now made in full using the liability method. Deferred tax was recognised as a result of the re-measurement of available-for-sale securities, pension and post retirement benefits, accelerated depreciation, tax losses, unrealised foreign exchange gains/losses and interest receivable and payable.
- (v) Items previously categorised as deferred expenditure did not meet the requirements of IFRS, and were written off at the end of 2002.
- (vi) As required under IAS 41, biological assets previously included in inventories have been reclassified.
- (vii) Retirement benefit assets and obligations, which were not required to be recognised under previous Jamaican GAAP, are now recognised in full. Retirement benefit assets and obligations are determined by independent actuaries using the Projected Unit Credit Method.
- (viii) This represents outstanding vacation leave due to employees, which is being accrued as required under IAS 19.
- (ix) IAS 10 determines when an enterprise should adjust its financial statements for events after the balance sheet date. Where dividends to holders of equity shares are proposed or declared after the balance sheet date, an enterprise should not recognise those dividends as a liability at the balance date. Accordingly, dividends payable for the years ended 27 April 2002 and 3 May 2003 have been reclassified.
- (x) This reflects an adjustment in the provision for impairment of trade receivables. The methodology for determination of impairment provision under IFRS differs from previous Jamaican GAAP. IFRS requires the use of a discounted cash flow methodology taking into account the time value of money.
- (xi) Under IFRS, income or expenses are no longer categorised as exceptional items and consequently such income has been transferred to other profit and loss accounts.
